

CSD 15 proposed preparatory process for Africa

**Edouard Traoré,
CSD 15 Vice Chair
Burkina Faso**

Key issues to be considered

- **CSD-15 will set the global energy framework for the near to medium term and should reflect Africa's collective position.**
- **The starting point for determining the commonality between African countries is the Regional Implementing Mechanism (RIM) which determined the major axis's of energy issues for African countries.**
- **Elaboration of position paper should also built on progress made on energy access issues at the national and the regional level through the respective Regional Economic Communities (REC), notably ECOWAS, EAC, CEMAC, and SADC.**

Timeline

Date	Main Benchmark
1/12	GFSE
From 8/01 to 2/02	Sub regional consultation process led by REC to review first synthesis paper
