

Side Event

Showcasing Innovative Austrian Clean Energy Technologies

10. May 2017, 14:00 – 15:30 | Room: C5, Vienna International Centre

The Global Forum on Sustainable Energy (GFSE) in cooperation with Austrian Federal Economic Chamber (WKO), the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management (BMLFUW) and the Austrian Development Agency (ADA), is organizing the VEF Side Event: “Showcasing Innovative Austrian Clean Energy Technologies”.

CO-ORGANIZERS

Global Forum on Sustainable Energy (GFSE)
Austrian Federal Economic Chamber (WKO)
Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management (BMLFUW)
Austrian Development Agency (ADA)

BACKGROUND

The transformation of the global energy system requires widespread innovation at several levels, including innovative business models and financing, social and technology innovation as well as appropriate policies. However, holistic solutions are needed that do not see technological innovation in isolation. In many countries, suitable clean energy innovations exist, but have not obtained market-wide penetration due to a lack of regulatory frameworks and funding to scale them up.

In order to enable a full transition to clean energy in developing countries, multiple actors have to be involved to provide effective and sustainable solutions. Long-term partnerships, which take local conditions into consideration and enable cooperation between policymakers, citizens and members from the industry, academia and research, will play an increasingly important role in the future. There is an urgent need to combine different knowledge to deliver affordable and clean energy services that suit local demands.

OBJECTIVES

The GFSE-WKO Side Event aims to bring together representatives from the private sector, to discuss clean energy solutions for the developing world. The event will showcase examples of innovative technologies from Austria that could be deployed in developing countries, while also emphasizing the importance of effective partnerships to strengthen local energy systems. After initial impulse statements, participants will exchange experiences and discuss framework conditions for comprehensive solutions to enabling a transition towards sustainable energy in developing countries.

Moderator: Cornelia Schenk, Austrian Development Agency (ADA)

Showcasing Innovative Austrian Clean Energy Technologies 10. May 2017, 14:00 – 15:30, Room: C5, Vienna International Centre	
10 min	Opening and Welcome Addresses
	<ul style="list-style-type: none"> • Ms. Cornelia Schenk, Advisor Sustainable Energy, Austrian Development Agency (ADA) • Mr. Franz Bachleitner, International Projects Network, Austrian Federal Economic Chamber (WKO)
20 min.	Impulse Statements
	<ul style="list-style-type: none"> • Mr. Federico Villatico-Campbell, Climate Technology Manager, Climate Technology Centre & Network (CTCN) • Mr. Robert Soell, Head of Project Development, SOLID - solarinstallation+Design
50 min.	Panel Discussion
	<ul style="list-style-type: none"> • Mr. Federico Villatico-Campbell, Climate Technology Manager, Climate Technology Centre & Network (CTCN) • Mr. Andreas Feichtinger, Area Sales Manager EMEA, Gildemeister Energy Solutions • Mr. Manfred Stockmayer, Carbon Asset Manager, Likano Climate Protection Projects • Mr. Robert Soell, Head of Project Development, SOLID - solarinstallation+Design • Mr. Robert Buchinger, CEO, Sunlumo Technology <p><i>Q&A session</i></p>
10 min	Closing Remarks & Wrap-Up
	<p><i>All Participants</i></p> <p>Moderated by: Ms. Cornelia Schenk, Advisor Sustainable Energy, Austrian Development Agency (ADA)</p>
